Heather Dunlop

Software Engineer

Glasgow, Scotland | hdunlop310@gmail.com | linkedin.com/in/hdunlop310 | dunlopdev.com

PROFILE

Glasgow-based software engineer with 4+ years of Python experience on risk applications, now building frontends in React. Experienced in AI-driven development, including creating custom skills and agents. Comfortable working hands-on with traders and quants.

EXPERIENCE

Senior Associate Software Engineer Sep 2022 – Present

JPMorgan Chase, Glasgow

- 4+ years building Python backend applications across multiple risk systems, including risk calculation engines.
- Experienced in AI-driven development, including creating custom skills and agents.
- API creation and development (REST APIs).
- Developed on legacy Python frontends and migrating a Python frontend to React.
- Data visualisation and manipulation, and orchestration workflows.
- Simple chatbot development.
- Worked hands-on with traders and quants.

Python, REST APIs, React, AI-driven development, data visualisation, orchestration

Software Engineer Intern Jun 2021 – Aug 2021

JPMorgan Chase, Glasgow

- Worked on a legacy Python UI and developed Python chatbots.
- Experimented with building a neural network from scratch to learn how chatbots work, then implemented a Rasa chatbot for the team.

Work experience placements 2015 – 2017

IBM, Greenock & Edinburgh (Aug 2017): updated packages on cloud and Linux machines, created a visual presentation deck.
British Gas, Uddingston (Nov 2015).

PROJECTS

neontetrashop Aug 2026 – Present

neontetrashop.com

- Shopify store for a Glasgow small business: custom CSS and Liquid theming, seasonal theming and UX/UI design.
- Instagram and Facebook integration with Shopify, plus store settings, discounts and setup.

Pub Crawl Live Tracker 2026

pubcrawl.tennentsenjoyer.workers.dev

- Live leaderboard, map and reviews for a group pub crawl on Cloudflare Workers and KV, with an organiser mode for editing the route. No accounts needed.

Hashing Education App 2021 – 2022

- Final-year university project: a Swift iOS app teaching school students how hashing works, with interactive lessons on collisions and the birthday attack.

EDUCATION

BSc (Hons) Computing Science, 2:1 2018 – 2022

University of Glasgow

Specialism in Information Security. Coached 3rd-year students on their software engineering team project.

CERTIFICATIONS

- **AWS Certified AI Practitioner**, Amazon Web Services (Oct 2026)
- **AWS Certified Cloud Practitioner**, Amazon Web Services (2023 – 2026)
- **Symphony Associate Developer**, Symphony (2022)
